BUSINESS FORUM
2014**

8th May 2014
BMW-World, Business Center, in Munich

Co-organized by:

GERMAN-SINGAPORE BUSINESS FORUM

The German-Singapore Business Forum (GSBF) is a biennial event which aims to promote business and capabilities partnerships between German and Singaporean SMEs; with a focus on three key sectors - Precision Engineering, Medical Technology and Clean Technology. Since its inception in 1994, the GSBF has been instrumental in strengthening bilateral business relations and has been recognized as a key platform for companies to exchange ideas, network and identify collaboration opportunities.

ABOUT SINGAPORE

Clean Technology SINGAPORE: Global Clean Technology Hub

Addressing heightened international concerns over climate change and rapid urbanization, Singapore aims to be a global hub where clean technology products are developed, made and exported overseas. Small-medium enterprises (SMEs) that specialise in areas such as clean energy, water treatment and waste management constitute more than 80% of the environmental technology industry in Singapore.

Medical Technology SINGAPORE: Centre for Medical Devices & Equipment Manufacturing

Singapore has established its position as a trusted and competitive site for leading medical technology companies to develop and manufacture innovative products for Asia and beyond. Today, the country manufactures S\$3 billion worth of medical technology products for the global market each year. Singapore companies are a key enabler of this presence.

Precision Engineering SINGAPORE: Asia's Hub for Manufacturing Excellence

With Asia's rapid transformation into a significant landscape for manufacturing activities, Singapore has

been positioned at the centre of this buzz. Manufacturing, accounting for a quarter of the national GDP, is a key engine driving the Singapore economy. Our strategic location and top-class infrastructure allows for first-hand connectivity to the world, offering a conducive environment for the setting up of global business headquarters.
